Rating Rationale and Key Rating Drivers

Askari Bank has shown stable growth rate over the years. This has ensured its relative profitability to remain intact. The bank has a strong brand image, flanked by its affiliation with one of the strongest conglomerate, Fauji Foundation Group. The ownership structure has proven itself a strong backing, as reflected by Askari Bank's history. The Bank has continued the growth trajectory during 2018. The net spread has improved on the back of significant improvement in asset yield amidst slightly higher cost of funds. Volumetric increase in earning assets, led by loan portfolio augmentation, provided support to profitability; but was negatively impacted due to higher provisioning expense on mark-to market loss of investment and NPL provisioning. The bank had a sizeable reversal in specific charge NPL provisioning during 2018, yet the positive impact was diluted by a higher incidence of provisioning expense. This also impacted the profitability for 2018.

The Bank's CAR is 12.5% at end-Dec18. The Tier 1 capital increased from 9.31% in 2017 to 10.92% in 2018 while the overall CAR improved by 40 basis points. With minimum CAR requirement of 12.5% by next year, the Bank would need to tread ahead with a cautious approach while lending in order to maintain sustainability with growth. The deposit growth was sizeable, enabling the bank to hold its relative position.

The ratings are dependent upon sustainability of the bank 's relative positioning and continuous improvement in capital adequacy, whereas, effective management of spreads remains important. Meanwhile, holding the asset quality is a pre-requisite.

The Pakistan Credit Rating Agency Limited

Commercial Bank

Profile

Structure Askari Bank Limited (AKBL), incorporated as a public limited company, commenced operations as a Scheduled Commercial Bank in 1992.

Background The bank has a steady presence in Islamic banking as well. Started in 2006, the bank provides a range of shariah compliant products under its Islamic brand name 'Ikhlas'

Operations The Bank, with its head office in Islamabad, operates with a network of 516 branches at end-Mar19. The bank has a widespread ATM network of over 583, covering all major cities. The Bank's market share in terms of customer deposits stood at 4.4% (CY17: 4.4%).

Ownership

Ownership Structure The current sponsors, Fauji Foundation Group, own 71.9% stake of the Bank. The remaining stake (28.1%) is widely spread among financial institutions, and general public.

Stability Fauji Foundation (FF) is a Charitable Trust and is exclusively devoted to the welfare of ex-servicemen of the Pakistan Armed Forces and their dependents. Over the years, FF has emerged as one of the leading conglomerates of the country with established business interests in numerous sectors and industries.

Business Acumen The Fauji Foundation Group comprising several industrial/commercial projects in various sectors including energy, gas supply, fertilizer, cement, food etc, includes wholly owned as well as partly owned ventures. The group, with its increased penetration in the major facets of the economy, has garnered expertise and knowledge of various sectors which provides it with a holistic view of the macro economy and a strategic viewpoint.

Financial Strength Fauji Foundation is one of the leading and most diversified groups in Pakistan. The group has a strong equity and asset base. Over the years the group has stretched its business profile by entering into new industries, providing it with diversity in revenue streams, strong brand image and an increased hands-on knowledge of the various sectors of the economy.

Governance

Board Structure Overall control of the Bank vests in the eleven-member Board of Directors (BoD) including the President & CE. Chairman of the BoD is Lt. Gen Syed Tariq Nadeem Gilani. Five of the board members are Fauji Foundation nominees; four are independent members, while one represents NIT. The board composition and membership reflects diversified experience with sound business acumen of the nominated directors.

Members' Profile The members carry diversified experience in Financial Institutions (Banking, AMCs), public sector entities, Oil and Gas, Power, Fertilizer, IT etc. Most of the directors have completed their trainings as part of Code of Corporate Governance and meet the criteria specified by SECP.

Board Effectiveness During the year, seven board meetings were held. Attendance of board members in these meetings remained good. There are four board committees in place; i) Board Audit, ii) Board Risk Management, iii) Board Human Resource and Remuneration, and iv) Board Information Technology.

Financial Transparency The audit committee comprises five members, all of whom are non-executive directors while three of them are independent directors including the chairman. A.F. Ferguson & Co. Chartered Accountants, the external auditors of the bank, expressed an unqualified opinion on the bank's financial statements for the year ended December 31, 2018.

Management

Organizational Structure The Board appointed Mr. Abid Sattar in Jun-18 as President and CE. He has extensive expertise, both locally and overseas, in the financial services industry.

Management Team The Bank has eight management committees in place to oversee its day-to-day operational matters; seven of them are headed by the President. The committees ensure, that the bank is aligned with its current strategy. Going forward, sustainability and cohesiveness of the team would remain important to continue the growth trend.

Effectiveness AKBL's operations are currently divided in 23 functions, out of which 14 are directly reporting to the President. Chief Internal Auditor reports to the Board Audit Committee.

MIS The bank has implemented Flexcube (developed by Oracle financial services and installed at over 750 sites worldwide), as its core banking software.

Risk Management Framework The Bank has a robust Risk Management Framework driven by the Board Risk Management Committee and managed by Risk Management Group. Risk Management Group is headed by the Chief Risk Officer (CRO), who is overseeing independent divisions for management of Credit, Market/Liquidity, Information Security, policy and Operational Risk.

Business Risk

Industry Dynamics The year 2018 was a marked year as the industry saw an expansion of ~22% in advances, although the deposit growth rate stayed in single digit. As a result the industry saw a rise in the ADR ratio from 50% to 55%. In terms of advances expansion, a predominant portion went in to energy sector followed by textile, individuals and agriculture. Corporate sector claimed the major portion of the borrowings with small amounts going into commodity, consumer and SME sectors. Profitability of the banks has taken a hit due to incremental costs and provisioning on account of NPLs. After a lapse of few years the industry NPLs have seen a accretion which is a concern going forward.

Relative Position During CY18, Bank's customer deposits (PKR 570bln) increased by ~9% in line with the sector's growth of ~9.5%. AKBL maintained its system share in terms of total deposits at 4.4% (CY17: 4.4%).

Revenues On the gross markup income side, Bank reported a 20% increase amounting to PKR 7.4bln. Of this increase, income on advances constituted the major chunk increasing 40% to PKR 23.8bln (CY17: PKR 17.0bln). Non-markup income of the Bank saw a decline of ~10% YoY, clocking in at PKR 5.6bln (CY17: PKR 6.2bln) with major contributions coming in from fee and commission income and income from dealing in foreign currencies. During first quarter ending March 2019, Bank reported a massive increase of 56% in gross markup income clocking in at PKR 14.2bln (3MCY18: PKR 9.1bln) whereas non-markup income of the Bank was reported at ~PKR 1.4bln (3MCY18: ~PKR 1.2bln).

Performance Profit before tax of the Bank shrunk by 19% over the last year and was reported at PKR 6.88bln (CY17: PKR 8.49bln). Provisioning expense saw a 2x increase over the previous year (CY18: PKR 1.4bln, CY17: PKR -1.3bln). The bank's yield on advances was impacted positively by increasing interest rates environment and stood at 7.4% (CY17: 6.5%). The bank's cost of deposits increased less than proportionately (CY18: 4.0%, CY17: 3.4%) compared to the asset yield.

Sustainability The budgeted forecasts and actual numbers of AKBL have strong correlation. Increasing interest rate environment helped the bank in increasing its spread and earning higher profitability.

Financial Risk

Credit Risk During CY18, AKBL's gross advances registered a massive growth of ~32% YoY. ADR on the back of higher credit off-take by the bank saw a massive improvement to 60% at end-Dec18 (end-Dec17: 49%). At end CY18, the Non-performing loan base of the Bank almost remained static with marginal decrease of PKR 96mln and was reported at PKR 26.6bln. The coverage and infection ratios of the Bank improved and were reported at 98.1% (CY17: 95.9%) and 7.2% (CY17: 9.4%) respectively.

Market Risk The investment portfolio showed a contraction of 17% to PKR 260bln during CY18 (CY17: PKR 315bln), primarily due to loss incurred on fixed income securities, especially PIBs amidst rising interest rates. The bank's investment portfolio constitutes 37% of total asset base and government securities continue to dominate the overall investment book (96%).

Liquidity And Funding The Bank was able to attract deposits with similar proportion of current and saving accounts, thus maintaining its CASA ratio at 84.7% (CY17: 84.4%). The deposit base of the Bank registered an increase of PKR 47bln (9% YoY) over Dec-17. AKBL issued a perpetual, unsecured, unlisted TFC (ADT1) of PKR 6,000mln in July 2018. AKBL continued to fund major portion of its assets through deposits (81%).

Capitalization AKBL is an adequately capitalized institution with an equity base and CAR above the regulatory requirements. However, higher provisioning expense of PKR 2.8bln put a dent in Bank's CAR on Dec18 to 12.51% (Dec17: 12.09%), despite a PKR 6bln TFC issued in Jul-18.
