Rating Rationale and Key Rating Drivers

Nishat Paper Products Co Ltd.'s ("NPPCL" or the "Company") ratings reflect the strong sponsor profile, satisfactory market position, and adequate financial profile of the Company. The demand for the cement packaging segment is directly linked with cement dispatches. The latest period reported a reduction in cement production reflecting an economic downturn. The increase in prices of all the construction materials has impacted demand for cement as well. Industry-wide volumetric decrease in sales has been reported but the selling prices have absorbed the impact to much extent. Total cement dispatches in Pakistan, including exports and local dispatches, fell by ~15% from around ~52mln metric tons in FY22 to about ~44mln metric tons in FY23. The reduced demand for cement bags has led to a decline in actual plant production. The plant has the capacity to produce 220mln bags annually, but its utilization capacity dropped to ~23% in FY23, from ~39% in FY22 (FY21: ~60%). As a result, the company's revenue hasn't experienced substantial growth. In FY23, NPPCL achieved a topline of PKR 3,092mln, marking a modest increase of about ~1% compared to PKR 3,070mln in FY22 (FY21: PKR 3,980mln). Furthermore, the Company faced challenges with rising raw material costs due to inflation and exchange rate fluctuations, impacting its gross profit margin declined from ~21.8% in FY22 to about ~15.5% in FY23. Additionally, increased finance costs led to a reduction in the net profit margin, dropping from around ~9.5% to ~(-5.7%) during FY23. The Company posted a net loss of ~PKR (177)mln in FY23 (FY22: ~PKR 292mln, FY21: ~PKR 525mln). The cement's demand is expected to come full circle once the macro-level fundamentals improve. Furthermore, the industry is also diverging more towards PP bags as these are less costly compared to KP bags. However, being the subsidiary of D.G. Khan Cement Company Limited, NPPCL derives strength and economies of scale from the parent company, which bodes well for the ratings. The Company has leveraged capital structure. Long-term debt is related to expansion activities, whereas short-term debt has increased substantially pursuant to slow movement in receivables. However, the majority of receivables are from the related party which gives comfort to the credit risk. Going forward, the Company is planning to diversify its revenue stream by introducing a new product line that would support the Company in stable profitability.

The ratings would remain dependent upon the company's ability to sustain its healthy business profile amidst strong competition, herein, effective and prudent management of financial risk indicators remain important. Moreover, upholding of governance framework is vital.

Business Risk

Industry Dynamics Pakistan's packaging industry consists of four major segments, paper, plastic, tinplate and glass. Paper and plastic segments occupy the major share in total market. NCCPL operates under paper segment of the Industry. The demand for the cement packaging segment is directly linked with cement dispatches. The latest period reported a reduction in cement production reflecting an economic downturn. The increase in prices of all the construction materials has impacted demand for cement as well. Industry-wide volumetric decrease in sales has been reported but the selling prices have absorbed the impact to much extent. Total cement dispatches in Pakistan, including exports and local dispatches, fell by ~15% from around ~52mln metric tons in FY22 to about ~44mln metric tons in FY23.

Relative Position NPPCL is one of the main players in the industry. Large market players in the paper segment are Cherat Packing Ltd (production capacity 660mln bags/annum), Thal Ltd (production capacity 356mln bags/annum). The utilization capacity of the plant is dropped to ~23% in FY23, from ~39% in FY22 (FY21: ~60%).

Revenues The Company generates revenue by selling paper sacks to cement manufactures. Major customers are DG Khan Cement, Best Way cement and Lucky Cement. Top Customer DG Khan Cement contributes above ~80% of total revenue. The reduced demand for cement bags has led to a decline in actual plant production. As a result, the company's revenue hasn't experienced substantial growth. In FY23, NPPCL achieved a topline of PKR 3,092mln, marking a modest increase of about ~1% compared to PKR 3,070mln in FY22 (FY21: PKR 3,980mln).

Margins Kraft paper and chemical wood pulp serve as primary raw materials in paper packaging production. While 95% of these materials are imported, the remaining 5% is locally sourced, including ink and glue. In FY23, the Company faced challenges with rising raw material costs due to inflation and exchange rate fluctuations, impacting its gross profit margin that is declined from ~21.8% in FY22 to about ~15.5% in FY23. Furthermore, there has been a notable rise in finance costs, increasing from PKR 173mln during FY22 to PKR 462mln during FY23. This surge has consequently resulted in a decrease in the net profit margin, dropping from around 9.5% to (-5.7% net loss) during FY23. The Company posted a net loss of ~PKR (177)mln in FY23 (FY22: ~PKR 292mln, FY21: ~PKR 525mln).

Sustainability The Company is a subsidiary of DG Khan Cement and came into existence as a result of vertical integration into supply chain line. The main purpose of the Company is to supply packaging material to the parent Company.

Financial Risk

Working Capital The Company's working capital management is supported through short-term running finance facility obtained from a consortium of banks. NPPCL inventory days stood on higher side at ~142 days during FY23 (FY22: ~89 days), but the receivable days decreased to ~124 days (FY:22 ~163 days). Resultantly, the net working capital days increased to ~263 days during FY23 (FY22: ~248 days).

Coverages In FY23, NPPCL's FCFO's stood at ~PKR 100mln decreasing from ~PKR 519mln in FY22. The FCFO/Finance cost also showed a decrease from ~3.0x of coverage during FY22 to ~0.2x during FY23 due to decline in FCFO's and rise in finance cost from PKR 173mln during FY22 to PKR 462mln during FY23.

Capitalization The Company has a moderate-leveraged structure and its gearing ratio has increased from ~39.8% at the end of FY22 to ~58.3% at the end of FY23 due to increase in short term borrowing from PKR 960mln at end FY22 to PKR 2,431mln at end FY23. Going forward, the Company is planning to diversify its revenue stream by introducing a new product line that would support the Company in stable profitability which will be financed through the mix of debt and equity.

Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	
BB	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB-	
B+	
B	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	
CC	Very high credit risk. Substantial credit risk "CCC" Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. "CC" Rating indicates that default of some kind appears probable. "C" Ratings signal imminent default.
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.

A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

*The correlation shown is indicative and, in certain cases, may not hold.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults, or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.

Note. This scale is applicable to the following methodology(s):

a) Broker Entity Rating	e) Holding Company Rating
b) Corporate Rating	f) Independent Power Producer Rating
c) Debt Instrument Rating	g) Microfinance Institution Rating
d) Financial Institution Rating	h) Non-Banking Finance Companies Rating
