### **Rating Rationale and Key Rating Drivers**

The rating reflects the Company's healthy financial profile, supported by robust business volumes in the health, fire, and motor segments, consistent profitability and a substantial income stream from its investment book. The rupee's devaluation has served as a driver for an upsurge of Gross Premium Written (GPW), supplementing the Company's organic growth.

The assigned rating also takes comfort from the Company's association with Abu Dhabi Group. Moreover, Alfalah Insurance capitalizes on its unique portfolio in the health segment, which accounts to a significant portion of the total Gross Premium Written (GPW). The Company's prudent risk retention strategy in the motor segment has yielded higher underwriting profitability. The synergies with Bank Alfalah Ltd. (BAFL), one of the largest private banks in Pakistan, have positively influenced business volumes in the motor segment and facilitated growth in the health product. The Company's non-captive business volumes have shown consistent growth over the years, further strengthened by diversification into smaller segments. This diversification provides stability to the Company's topline. The Company's substantial involvement in window takaful operations has provided a noteworthy boost to its top line, contributing to its overall growth. Additionally, the Company's investment income is robust and contributes to the overall strength of the bottom line. Enhanced liquidity and sound cash flow generation capability add further strength to the assigned rating. Alfalah Insurance has demonstrated its commitment to shareholders by paying dividends, highlighting its financial stability. The presence of internationally recognized and highly rated reinsurance companies provide additional support to the Company's risk management framework. The rating also takes into account the Company's effective corporate governance practices and the presence of an experienced management team that has been associated with the firm since its inception.

The assigned rating is dependent on the Company's ability to augment its market position within the competitive landscape while maintaining a strong underwriting performance. It is crucial for the Company to strengthen its liquidity profile and exercise prudent management of claims and receivables.

BB++ (ifs) BB+ (ifs) BB (ifs)	Modest. Modest capacity to meet policy holders and contract obligations. Though positive factors are present, risk factors are relatively high, and the impact of any adverse business and economic factors is expected to be significant.
B++ (ifs) B+ (ifs) B (ifs)	Weak. Weak capacity to meet policy holders and contract obligations. Risk factors are high, and the impact of any adverse business and economic factors is expected to be very significant.
CCC (ifs) CC (ifs) C (ifs)	Very Weak. Very weak capacity to meet policy holders and contract obligations. Risk factors are very high, and the impact of any adverse business and economic factors may lead to insolvency or liquidity impairment
D (ifs)	<b>Distressed.</b> Extremely weak capacity with limited liquid assets to meet policy holders and contract obligations, or subjected to some form of regulatory intervention or declared insolvent by the regulator.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) cessation of underlying entity, c) the debt instrument is redeemed, d) the rating remains suspended for six months, e) the entity/issuer defaults., or/and f) PACRA finds it impractical to surveill the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.

Note. This scale is applicable to the following methodology(s): General Insurance & Takaful Operator, Life Insurance & Family Takaful Operator.
