Rating Rationale and Key Rating Drivers

MCB Islamic Bank Limited (MIB) is a wholly owned subsidiary of MCB Bank Limited (MCB). MCB has long term rating of "AAA" reflecting its robust profile duly supplemented by its strong market position in local banking landscape, established brand equity, and sound financial profile. MIB's standalone risk profile is improving. The management's strategy is to consolidate the financing book of corporate clients; curtailed financing book in CY19 to support the same. MIB has set relatively high targets for deposit growth and plans to focus on maintaining its financing book quality. MIB is a small-sized bank with sustainable growth and has witnessed an increase of 22.6% in its customer's deposit, improving its system share. The Bank's continuous focus on the accumulation of low-cost deposit has resulted in a healthy current and savings (CASA) deposit mix. Despite many economic challenges owing to the pandemic, the Bank witnessed a robust growth in its loan book. Moreover, borrowers, having aggregate outstanding exposure of PKR 5,052mln, have availed regulatory relief; the risk of increase in credit losses persists. During CY20, the earnings marked significant improvement this time after incurring losses over the past many years. Capitalization remains comfortable as reflected by Tier I and overall capital adequacy ratio (CAR) of 11.32% and 12.01%, respectively, as on Dec'20. The ratings incorporate the sponsor's willingness to support MIB in the time of need. COVID-19 is an ongoing challenge. While it has taken a toll on many businesses, its ramifications are still unfolding. The proactive measures taken by the regulators and other concerning bodies have mitigated the potential damages much anticipated from this pandemic. As a result, the banking industry remained protected and in fact posted record profits. Vigilance is required as the loan repayment cycle remains amid variants of the pandemic continue to re-emerge.

The ratings are dependent on Bank's ability to hold its risk profile, while maintaining its relative market position in the banking industry. Any weakening in asset quality will in turn put pressure on the Bank's profitability and risk absorption capacity.

The Bank, has developed Operational Risk Management Framework. Operations Risk & Internal Control Unit has been working to strengthen the internal control environment of the Bank.

Business Risk

Industry Dynamics The indicators of the banking sector reflected mixed trend where economy is recovering from the effects of COVID-19 pandemic. Despite challenging economic conditions prevailing in CY20 due to COVID-19 outbreak, the banking sector managed to grow by a decent pace. Deposits of the banking sector grew by 16.1% to PKR 18,519bln (CY19: PKR 15,953bln) as compared to 11.9% growth in CY19. The surge in deposits provided the necessary funding support to finance the robust rise in investments (CY20: PKR 11,935bln; CY19: PKR 8,939bln) and particularly towards government instruments. During CY20, advances witnessed a mild contraction owing to slackness amid COVID-19 pandemic outbreak. The policy measures rolled out by the SBP enabled the sector to enhance profitability, improve resilience and limit the credit risk. With the completion of deferment period allowed, the aftermath is yet to be comprehended by the industry.

Relative Position MIB is a small-sized bank with sustainable growth and has witnessed an increase of 22.6% in its customer's deposit to PKR 93.1bln, improving its system share at 0.6% (CY19: 0.5%).

Revenues During CY20, the gross mark-up income of the Bank witnessed a marginal contraction of 1.8% to PKR 9,676mln (CY19: PKR 9,849mln), on account of a decrease in income of advances owing to steep decline in policy rate. The non-markup income of the Bank accelerated by 97.7% YoY, clocking in at PKR 678mln (CY19: PKR 343mln), mainly on account of increase in fee & commission income along with a substantial increase in foreign exchange income. Ultimately, the total revenue of the Bank grew by 17.0% to PKR 5,074mln (CY19: PKR 4,337mln) as at end-Dec20. The Bank's core spread adversely impacted with the reduced interest rates during 3MCY21 to 4.5% (3MCY20: 7.0%), dominated by investment and advances yields of 8.2% and 8.0% respectively.

Performance During CY20, the Bank's yield on assets deteriorated to 10.3% as compared to the last year of 12.6%. This contraction was a manifestation of curtail in key policy rate. The Bank's cost of funds revealed an improvement to 5.1% (CY19: 7.0%) due to the low cost borrowed funds. Despite high inflationary pressures, the Bank was largely able to manage its non markup expenses, inched up by 3.6% to PKR 4,665mln as compared to a significant increase of 45.8% in CY19. This improvement was driven by an effective management control in order to sustain profitability levels. Which is ultimately, translated into operational profitability this time after incurring losses as PAT clocked in at PKR 208mln as compared to loss of PKR 244mln in CY19. During 3MCY21, the Bank witnessed a significant increase in its PAT, reported at PKR 55mln (3MCY20: PKR 6.2mln). The effective management of portfolio mix enabled the Bank to improve its profitability.

Sustainability The management intends to continue with its strategy of long-term sustainable profitability by focusing on mobilizing no and low cost deposits along with high earning assets and containment of operating costs. However, the ability to manage the asset quality will be critical for the Bank under the current situation.

Financial Risk

Credit Risk During CY20, the Bank witnessed decent growth of 65.5% YoY in net advances and customer's deposit registered impressive growth of 22.6% YoY. This led to ADR at a level of 94.1%; significantly higher than the industry average. Top sector concentration stood at 64.0%, reflecting high dependence on a single sector. Moreover, borrowers, having aggregate outstanding exposure of PKR 5,052mln, have availed regulatory relief; the risk of increase in credit losses persists. During 3MCY21, net advances remained stagnant at PKR 84,547mln (CY20: 84,896mln) due to weak demand.

Market Risk The Bank's investment portfolio constituting 23.3% of the total earning assets at end-CY20 (end-CY19: 18.9%). However, a significant increase of 79.3% in investments was seen during CY20. Moreover, the mix of government securities in overall investments also enhanced to 95.9%; hence, the Bank is exposed to relatively low market risk.

Liquidity And Funding Bank's liquidity position deteriorated as reflected in the liquidity ratio at 34.3% (CY19: 39.2%) on account of decline in deposits with banks. Meanwhile, top-20 deposits concentration remained stagnant at 28.0% at end-CY20 (end-CY19: 27.0%). During CY20, the Bank was able to attract deposits with similar proportion of current and saving accounts, thus almost maintaining its CA and SA ratio at 31.1% and 44.6% respectively. During 3MCY21, the composition indicates that current and savings account deposits (CASA) together explain 74.9% of the total deposits.

Capitalization The Paid-up Capital of the Bank stands at PKR10.2bln and the Capital Adequacy Ratio (CAR) stands at 12.3%, is in compliance with the required CAR of 11.5% as at end-Mar'21. Moreover, the Bank's equity base stood at PKR 10.7bln in 3MCY21.

A+	
A	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB	
BB-	
B+	
B	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.
CC	
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
