Rating Rationale and Key Rating Drivers

Tata Textile Mills Limited – a public listed company – is primarily engaged in the manufacturing and sale of different varieties of yarn. The Company is part of Tata group that currently owns three textile mills, Island Textile, Salfi Textile, and Tata Textile Mills Limited. The group has also diversified into power and food sectors. Spinning industry was suffering from lower demand for cotton yarn from China owing to trade war with USA. The recent outbreak of COVID-19 pandemic has impacted the entire textile chain, as demand has gone down globally. The impact on yarn sales has been visible in both local and export markets. Tata Textile's margins and, in turn, profitability suffered as the Company incurred modest losses in 1HFY20. The ratings of Tata Textile incorporate the Company's moderate leveraging and adequate coverages. Cashflows are expected to remain under pressure in the short-term. Long association of experienced and professional management team and proven track record of sponsors add comfort. Going forward, management is planning to merge all three textile entities in order to benefit from economies of scale.

The Rating Watch signifies prevailing uncertain business dynamics due to COVID-19 outbreak and still evolving situation. The Company's production facilities, like other industrial units, have been shut down in line with the provincial Government's directive of lockdown. PACRA is closely monitoring the situation and will take rating action accordingly.

The ratings are dependent on improving business margins and outcome of current scenario. A prolonged downturn or halt in production leading to significantly lower revenues will impact the ratings. Prudent management of short-term liquidity and sustaining adequate coverages is critical.

Business Risk

Industry Dynamics Pakistan's textile exports displayed small growth in dollar terms in 1HFY20. While some leading textile categories displayed strong volumetric growth, the hit to unit prices on account of exporters having to share the benefit of the currency depreciation with buyers in the extremely competitive international market, curbed overall growth. Recent economic policies including the reimposition of duty on ginned cotton, removal of zero-rated status of the textile sector, as well as, disruption of global supply chains instigated by Covid-19 pandemic are expected to affect players across textile industry adversely.

Relative Position With 44,400 spindles Tata textile's position in Pakistan spindle capacity is considered small. However at group level Tata group has a better position among industry players with 127,092 spindles.

Revenues During FY19, the Company's topline increased by ~11% YoY to PKR 6,727mln (FY18: PKR 6,042mln). Increase in topline was on account of higher exports and better yarn prices in the local market. Growth trend in revenue continued through 1HFY20, with revenue increasing to PKR 3,848mln (1HFY19: PKR 2,962mln) primarily due to better yarn prices in the local market.

Margins Gross margin during FY19, experienced a slight decrease to 9.3% (FY18: 10.5%) and operating margin to 6.1% (FY18: 6.7%) due to increase in cost of sales (energy cost increased by ~16% and raw material cost by ~21% YoY). Net profit also decreased to PKR 33mln (FY18: PKR 246mln) on the back of lower operating profit and higher finance cost (FY19: PKR 281mln, FY18: PKR 150mln) which led to drop in net profit margin to 0.5% (FY18: 4.1%). During 1HFY20, gross margin further declined to 8.6% and operating margin to 5.7%. The Company made a net loss of PKR 74mln in the period due to higher finance cost (1HFY20: PKR 203mln, 1HFY19: PKR 109) and consequently recorded a net profit margin of -1.9%.

Sustainability During 1HFY20, Tata Textile Mills limited achieved full capacity utilization and no further expansion is envisaged in near future. Going forward, the management is working to increase the turnover and productivity of the Company, while reducing the cost of production.

Financial Risk

Working Capital During FY19, Tata Textile's net working capital cycle increased to 120 days (FY18: 100days) mainly due to increase in inventory days to 85days (FY18: 67days). Short term borrowings (STB) increased by ~58% to PKR 2,154mln (FY18: PKR 1,362mln) to finance higher levels of inventory (FY19: 1662mln, FY18: PKR 861mln). Despite increase in STB, the Company's room to borrow during the period stood at 27% due to higher net trade assets. During 1HFY20, net working capital cycle further increased to 127days and short term borrowings to PKR 2,164mln (1HFY19: PKR 2,138mln).

Coverages During FY19, the Company's cash flows (FCFO) decreased to PKR 508mln (FY18: PKR 600mln). Impact of increase in FCFO combined with increase in finance cost resulted in decline in interest coverage ratio to 1.9x (FY18: 4.4x) and debt coverage ratio to 1.4x (FY18: 2.3x). Coverages further decreased in 1HFY20, with interest coverage ratio declining to 1.5x (1HFY19: 2.6x) and debt coverage ratio to 1.3x (1HFY19: 1.7x).

Capitalization The Company has a moderately leveraged capital structure (FY19: 37.6%, FY18: 34.2%). Out of the total debt, ~20% of the debt comprises long term borrowings. Leveraging remained almost stagnant in 1HFY20 at 38.2% (1HFY19: 49.7%). Going forward, in the absence of any major capacity expansion, leveraging is expected remain moderate.

Credit Rating Scale & Definitions

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Long Term Ratings		Short Term Ratings	
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments	A1+	The highest capacity for timely repayment.
AA+ AA AA-	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.	A1	A strong capacity for timely repayment.
A+ A A-	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.	A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
BBB+ BBB BBB-	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.	A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
BB+ BB BB-	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.	B	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions.
B+ B B-	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.	C	An inadequate capacity to ensure timely repayment.
CCC CC C	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.		
D	Obligations are currently in default.		

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or in anticipation of, a) some material identifiable event and/or b) deviation from expected trend. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating Watch may accompany Outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) cessation of underlying entity, c) the debt instrument is redeemed, d) the rating remains suspended for six months, e) the entity/issuer defaults, or/and f) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.
