Rating Rationale and Key Rating Drivers

Secure Logistics Group Limited (“SLG or the Company”) is an integrated logistic group with synergetic business lines of Logistics, Asset Tracking, and Security Services. Since its PSX-listing, SLG has successfully achieved major key milestones for FY24 such as; (1) substantial deleveraging of the Balance Sheet through repayment of the debt and (2) upgrading of its commercial vehicles fleet. Several others milestones are well underway – these include (i) expansion of logistic services to the Regional markets through the TIR license (Transports Internationaux Routiers or International Road Transport), that would strategically position the company to capitalize on emerging opportunities within the region; (ii) investment in IT infrastructure along with the development of B2B third-party marketplace and (iii) expansion in distribution segment by addition of new Vehicles. The Company’s management and shareholders also have an established track record of value additions through capital markets as evident from its recent IPO and M&A activities. SLG has recently announced its plans to merge Trax Online Pvt. Ltd. into SLG and/or one of its subsidiary companies through a Scheme of Arrangement to be approved by the competent High Court. SLG has stated that it will endeavor to close the Transaction by December 31, 2024. Ratings take comfort from SLG’s above stated objectives, on-going value proposition and deleveraging which is also enhanced by its holding company structure and the formidable ownership arrangement which includes prominent local and international investors and sustainable business fundamentals, all underpinned by well-established reputé and relative market position. The Board of SLG is compliant with the code of corporate governance and comprised of highly skilled individuals with extensive yet diverse experience and independent oversight roles. During IHCY24 the Company’s top line grew by ~14.4% and recorded at PKR 1,027mln, supported by price inflation and an increase in capacity utilization leading to improved margins at all levels. The logistic industry of the country is highly fragmented with a dominating unorganized segment. It has also faced challenges due to soaring inflation, rupee devaluation, and high policy rates. On the flip side, there exists a notably sluggish pace of technology adoption, hindering the infusion of innovation and efficiency. However, the PKR stability, expected additional reduction in policy rates and planned enhancements to existing road infrastructure and the establishment of new SEZs under CPEC projects augur well for the logistics industry. Financial risk profile of the Company is considered good with comfortable coverages, cashflows, and working capital cycle. Current capital structure is low leveraged as a post-IPO substantial portion of borrowings has been paid off. The company intends to fund all future expansions through internally generated cash flows.

The ratings are dependent upon the improvement in business profile and successful implementation of business strategy. A prudent financial performance in line with the financial projections, an effective liquidity profile, and maintaining financial discipline shall remain imperative.
