### Business Risk

**Industry Dynamics** The media industry earns majority of its revenue from advertisements. Other revenue streams include production revenue, subscription revenue and revenue earned by selling user data. Pakistan's media industry, particularly television and radio, bloomed in the last two decades after the broadcasting sector was opened up to private players in 2002. As of February 2022, the Pakistan Electronic Media Regulatory Authority (PEMRA) has issued a total of 122 Satellite TV licenses and 4,084 Cable TV licenses. In FY21, the size of the media industry in terms of advertisement turnover stood at PKR107.4bln showing an increase of 33% from the FY20 where advertising turnover stood at PKR 81.04bln.

**Relative Position** The company holds a prominent position in the market. Total media players in industry is above 79 with major players; Group M and Brainchild. With respect to the advertising expenditure on TV, during FY21 Group M market share is 39% while Bee Squared Group is on second with 30% Market share.

**Revenues** The revenue of the company, consists of both service income and discounts, as a result of effective cash management. As at IHFY22 topline recorded at ~414mln and in FY21, the topline clocked in at PKR~802mln (FY20: PKR~780mln) showcasing an increase of 2.8% on a YOY basis. Due to Covid-19 there had been an overall decrease in all economic sectors. In spite of such challenges, BCP has been able to maintain and grew its revenue.

**Margins** The Company's overall profit margins continue to improve. Gross profit margin as at IHFY22 stood at ~24% and for FY21 clocked in at 21.4% (FY20 25.7%), while the net profit margin as at IHFY22 stood at 8.1 % and ~5.7% for FY21 (FY20: 4.7%). It is to be reiterated, that the profit margins have improved mainly as a result of the rise in income from discounts.

**Sustainability** Application for licenses of 40 new TV channels have been submitted to PEMRA. Regardless of the economic conditions, the clients are expected to continue spending on advertising as it is a necessity for the entities to reach the end consumer. Major renowned customers' name including government contracts are added recently in the portfolio with a good advertising budget.

### Financial Risk

**Working Capital** Due to the nature of the business, the total billings (which are to be subsequently paid to the media suppliers) form part of the trade receivables and payables. The working capital cycle is calculated with reference to the total billings as opposed to the revenue of the company. During IHFY22, the trade receivable days reached to ~80days and at FY21, the trade receivable days reached to 84 days (FY20: 118 days). On the other hand, the trade payable days as at IHFY22 stood at ~53 days and at FY21 ~54 days (FY20: 81 days). Consequently, net working capital cycle is impacted i.e. 28 days as at IHFY22 and in FY21 ~26days as compared to 37 days in FY20.

**Coverages** The free cash flows (FCFO) of the Company as at IHFY22 remained at ~127mln and during FY21 amounted to PKR ~271mln (FY20: PKR ~304mln). The increase is largely attributable to a rise in revenue of the company leading to a higher EBITDA. FCFO coverage to debt obligations (finance cost, CMLTD and uncovered short term borrowing) clocked in at 1.5x.

**Capitalization** Leveraging mix majorly comprises of short-term foreign currency loans, amounting to PKR~1,167mln as at FY21 (FY20: PKR~959mln), which are secured against the receivables of the company. As a result, the leveraging has remained in the bracket of 68% to 73% in the last three years. The devaluation of the PKR has also played a role in this regard.
