## **Rating Rationale and Key Rating Drivers**

The rating reflects the Hub Power Holdings Ltd.'s ('the Company') holdco structure - wholly owned subsidiary of The Hub Power Company Limited (HUBCO), very strong player in Pakistan's energy sector with installed capacity of 3,581MWs, contributing ~17% among total IPPs in terms of capacity generation. Hub Power Holdings holds the strategic investment in China Power Hub Generation Co. (Pvt.) Ltd. ('China Power') (~47.5%) and ThalNova Power Thar (Pvt.) Ltd ('ThalNova') (~38.3%). The Company has entered into a JV agreement (50:50) with Prime International Oil & Gas Co. Ltd. ('Prime International') and acquired all the upstream operations renewable energy assets owned by ENI in Pakistan. The Company also has acquired China Power Hub Operating Co. (Pvt.) Ltd. ('China Power Hub') (49%) through a JV agreement to operate and maintain China Power's plant. The Company received major share of profit from its associate i.e. China Power Hub Generation Company (Private) Limited and ThalNova Power Thar (Private) Limited amounting to ~PKR 18.79bln (6MFY23: ~PKR 13.11bln) and ~PKR 2.3bln (6MFY23: ~PKR 32mln). The Company also received profit of ~PKR 1.56bln from its JV Prime International Oil and Gas Company Limited but a loss of ~PKR 104mln (6MFY23: Loss of ~PKR 73mln) from China Power Hub operating Company during 6MFY24. The Company received dividends from China Power Hub Generation Co. (Pvt.) Ltd. amounting ~PKR 9.2bln. The Company has also issued a PPSTS amounting PKR 6bln for its working capital requirements. While having low leverage, the Company has room to borrow. Sponsor's support and their strong acumen of power sector dynamics benefit the ratings.

The ratings depend on timely materialization of projected timelines and generating cashflows. Consolidation of investments at holding company level and formalizing a strong and effective mechanism for monitoring performance will be critical, going forward. Maintaining strong financial profile and creating liquidity cushion remains important. Change in the government policy for payment mechanism of power projects, along with any significant delay in envisaged cashflows due to the current power sector dynamics/constraints would impact ratings.

Prime International signed a Sale and Purchase Agreement to acquire all the upstream operations and renewable energy assets owned by ENI in Pakistan. Moreover, the Company, lately, also executed an agreement for the incorporation of CPHO to provide services to China Power Hub.

Financial Risk The Company's topline is supported by share of profit from its investment in China Power (CY23: PKR 18bln, CY22: PKR 13bln), as the insurance company has principally agreed to the settlement of USD 65mln (PKR 13,831mln) to the damages and business loss caused due to tripping of power plant in Jul-21.
