Rating Rationale and Key Rating Drivers

The ratings incorporate TPL Trakker's prominent position in Pakistan's tracking industry, emanating from its multifaceted product portfolio and sanguine technology infrastructure. As diversity becomes inevitable to sustain in its operating segment, the Company is gradually shifting towards business avenues that are more beneficial for company's growth. The new segments have already achieved above par results, however, incremental yet consistent cash flows remain pivotal. The Company has acquired majority stake in Trakker Middle East LLC, with a view to enhance its presence in the Middle East market. Post-merger, TPL Maps & TPL Rupiya into TPL Trakker, the mapping division and locations based Services (LBS) has progressed significantly. Moreover, the Company stands as a public listed company since Aug'20. Underpinning the IPO, was the Privately Placed Commercial Paper (PPCP) which is now completely paid off. Lately, the Company added a Sukuk (PKR 1,250mln) to its liquid profile of which first principal repayment falls due by end of this ongoing year (CY21), therefore the pressure on the liquid profile in the shorter horizon appears manageable. The Company continues to face the pressure of high finance cost on account of its leveraged book, resulting in an overall bottom-line loss by the end 9MFY21. The situation accumulates the impact of COVID-19 pandemic in the country which has led to severe economic disruption and demand deceleration. Currently, the Company's financial risk profile exhibits improved interest and debt coverages alongside capital structure and cash conversion cycles, endurance of which is necessitated.

The ratings are dependent upon the strength of the underlying security of the instrument. The instrument is secured through a tiered security structure. Apart from the 'Hypo' charges, additional charge is placed on the TPL Corp Limited's long term investment of upto PKR 1,500mln(~17M ordinary shares of TPL Insurance Limited and 100M ordinary shares of TPL Life Insurance Limited). In addition to this, specific comfort to the assigned ratings is being drawn from the inclusion of pre default mechanism, comprising a facility payment account and facility service reserve account in which one instalment will be maintained.

Control Environment TPL is equipped with the most advanced technological solutions to support its business operations proficiently, allowing timely reporting.

Business Risk

Industry Dynamics In the backdrop of raging pandemic there were tremendous challenges being faced by the sector with drastic implications. Pakistan's tracking Industry is largely driven by the automobile segment, which was in the phase of turmoil in last 2/3years showing a constant decline. However, beginning of 2021 fortunately witnessed a recovery. The tracking industry also faced demand shift towards other services such as monitoring services from vehicle tracking/other related business avenues. Tracking business will be more dependent on fleet management and container tracking, going forward. Amidst increasing competition, continuous evolution is inevitable in such a technology driven industry.

Relative Position For over 18 years TPL Trakker Ltd has been a pioneer in the GPS tracker industry in Pakistan and it has sustained a strong position in the tracking industry of the country. Despite increasing challenges and competition in the market, holds a prominent market share of ~42% in tracking & fleet management industry and still outperforming the market. This was made possible primarily due to the shift in strategy by TPL Trakker and entering new avenues such as the Location Based Services (LBS) and Internet of Things (IoT) instead of relying solely on the Vehicle Tracking market.

Revenues TPL Trakker's revenue mainly comprises i) Equipment sale ii) Rental income iii) Monitoring income and iv) other services. Lately, new additions have started to contribute to the revenue base: Navigation, auto hardware & LBS. During FY20, total revenue clocked in at PKR 1.6bln, which is nearly close to last year (FY19: PKR 1.7bln) while in the 3QFY21 it stood at PKR 1.4bln (3QFY20: PKR 1.3bln), in line with industry dynamics. Major revenue contribution comes from rentals of tracking devices followed by monitoring income. The revenue base is expected to augment in coming periods in view of growth in Location Based Services, Internet of Things (IoT), CPEC and transshipment projects begin to take up pace. Location based services is yet another promising segment, adding more value to the business.

Margins Recovering revenues better management of cost structure translated in improving performance indicators: gross margins of the Company, stood at ~33% in 3QFY21 (FY20: 39%, FY19: ~57%), operating margins have recovered from negative, However net margins remained in red zone. Major hurdle to translation of gross margins into bottom-line is the financing cost, although reduced for the period but is still at a higher end. During 3QFY21, bottom-line showed a net loss of PKR~-156mln (3QFY20: PKR -319mln), representing shrink in the loss gap. The Company's bottom-line is expected to witness recovery in near future when revenues begin to instil.

Sustainability Multiple yet diversified revenue streams ensure the sustainable inflows for the business. The Company has secured Export Processing Zone mandate which is in the 2nd phase of STE project covering to and from container movement from Karachi Port to Export Processing Zone. In the near future, the EPZs will be covering dry ports as well. Additionally, introduction of integrated products, 'connected cars', in collaboration with auto manufacturers and near time CPEC project routing are expected to support the Company's growth. Moreover, TPL Rupiya & TPL Maps has been merged into the Company whereas international collaborations are under deliberations which is expected to drive synergies.

Financial Risk

Working Capital TPL Trakker's working capital requirements emanate from credit allowance to corporates and financial institutions; financed through short-term borrowings. In 3QFY21, the cash cycle has reduced to 159days (FY20: 213days). The Company has obtained eight RF credit facilities dedicated to working capital needs. As per the norms of the industry, aging analysis reveals that most of the debtors take about minimum four months to pay, which mainly constitute corporate clientele.

Coverages During 3QFY21, shrinking losses at PBIT level, resulted in a free cash flows (FCFO) of PKR 379mln as compared to PKR 398mln in FY20. The finance cost kept the overall coverages conservative at 1.4x in 3QFY21 (FY20: 0.8x). Further Improvement in core cash flows is dependent upon the stabilization of ongoing outbreak and success of new products and initiatives.

Capitalization Company's capital structure is stretched as another Sukuk has been issued, with an amount of PKR1.25bln inclusive of PKR 450mln greenshoe option (@3month KIBOR + 3.00%). The instrument is secured through a tiered security structure. Apart from the 'Hypo' charges, additional security is placed on TPL Corp Limited's long term investment of upto PKR 1,500mln (~17M ordinary shares of TPL Insurance Limited and 100M ordinary shares of TPL Life Insurance Limited). In addition to this, pre default mechanism exists where one instalment will be maintained throughout the term in a facility reserve account.

*The correlation shown is indicative and, in certain cases, may not hold.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion on debt instrument is carried out on an ongoing basis till the maturity of the instrument or cessation of contract. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
