Business Risk

Industry Dynamics Soda Ash is an essential raw material used in manufacturing of Glass, chemicals, detergents and various industrial products. It is an anhydrous white powder or granular material that is available in two grades, light and dense. Demand for soda ash is expected to be spurred on as the trickle-down effects of the construction package begin to benefit glass demand, for which soda ash is a raw material. Meanwhile, demand for sodium bicarbonate, has been strong due to significant demand from poultry, confectionary and especially the textile industry which has been experiencing an increase in value added export orders during last few months. During IHFY21, the margins of the soda ash segment have improved slightly, with gross margin rising from 28% in FY20 to 31% and net margin increasing from 12% in FY20 to 15% in IHFY21.

Relative Position Olympia Chemicals is the second largest player in manufacturing of Soda Ash. OCL market share is ~35% share whereas ICI has ~65% share respectively. Barriers to the new entrants is considered strong as it requires huge capital investments.

Revenues During IHFY21, the Company's top-line increases by ~18% YoY and stood at PKR 4,473mln (FY20: PKR 7,605mln). The Company's top line is well diversified as it is engaged in both B2B and B2C businesses. The largest product segment is Soda Ash, which contributes over 50% of the top-line.

Margins In IHFY21, Company's gross margin has improved to ~28% (FY20: ~23%) as a result of overall industry resumption. Meanwhile, operating margin improved to ~21% (FY20: 17%) due to reduced marketing expense. The Company's finance cost recorded in IHFY21 to PKR 70mln (FY20: PKR 261mln). The Company's net profit in IHFY21 clocked in at PKR 610mln (FY20: PKR 718mln).

Sustainability Company has an essential segment of products which were allowed to operate in line with government directive even in lockdown period. Further the reduction in policy rate by 625bps reduced overall finance costs and had a positive impact on net margins of the segment.

Financial Risk

Working Capital In IHFY21, Company's inventory days reached to 49 days (FY20: 57 days, FY19: 47) as the Company maintained higher inventory level to cater to the upcoming demand needs. Meanwhile, in IHFY21, trade receivable days has reached to 35 days (FY20: 33days, FY19: 28days) . Gross working capital days reached to 85 days (FY20: 90 days, FY19: 75days). Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB	
BB-	
B+	
B	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default.
CC	
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
