#### Rating Rationale and Key Rating Drivers

The ratings encapsulate the strength of the security structure of Privately Placed Islamic Certificates (Sukuk). Sukuk has a multi-layered protection mechanism that provides intrinsic mitigation against unforeseen risks. Sukuk is secured by way of shares of TPL Properties, shares of TPL Trakker and TPL REIT units with 30% margin to be maintained at all times. However, during 3QFY24 the margin have remained volatile which the Company is managing by adding additional securities. The DPA is being held under exclusive lien for the benefit of the Participating Institution(s). DPA is being funded by a) the dividends from group companies, b) proceeds from the sale of Sponsor shares in TPL Trakker, and c) Right share issuance of the Company. The cash entrapment threshold for the proceeds from the sale of shares of TPL Trakker is two upcoming installments. Similarly, the cash entrapment threshold for the proceeds from Right Share issuance is three upcoming installments. As a last resort, the issuing agent has the right to liquidate the securities, in case, before the payment date, DPA is not funded, the issuing agent would initiate the process for the realization of the underlying security on an immediate basis. The maximum length of the cure period can be 15 days. The cure period availed would attract markup at the rate of 3MK + 250bps instead of the instrument existing markup at the rate of 3MK +225bps. In addition to the above-stated security, the TPL Corp Sukuk and TFC are also secured by way of an insurance guarantee amounting to PKR 75mln each in favor of TFC and Sukuk holders. This guarantee would cover the quarterly interest payment of the PP Sukuk and PPTFC. Though the company has made its 8th coupon payment to its investors, but unable to meet its margin requirements.

The rating would remain contingent on compliance with the security structure and timely fulfillment of the margin requirements. The Company is in the process of meeting the shortfall.

The Company has issued two long-term instruments (PP Sukuk and PPTFC) of PKR 2.2bln and PKR 2.3bln from its balance sheet. Both instruments were issued for a tenor of 5 years to reprofile the existing debt and invest in other Group companies. The leveraging ratio shows an incline from the issuance of the instruments. The Company intends to repay the instruments through dividend income and proceeds from the strategic divestiture of its investments. The total debt of the Company stood at ~PKR 4.8bln (CY23: ~PKR 4.8bln) due to the issuance of the instrument with an equity base of PKR 1.92bln (FY23: PKR 4.1bln).

## Instrument Rating Considerations

**About The Instrument** TPL Corp have issued a PP Sukuk of ~PKR 2.19bln to contribute towards reprofiling existing debt and acquiring additional group company shares. PP Sukuk carries a markup of 3M KIBOR plus 2.25% per annum. Profit is being paid quarterly in arrears calculated on a 365 day year basis on the outstanding principal amount. Principal redemption shall commence from the 3rd year of the issue date in 6 equal installments. PP Sukuk is secured by 178.78mln shares of TPLP, 15.5mln shares of TPLT and 25.74mln units of TPL REIT. TPL Corp plans to repay the issue through a right issue and dilution of investment in its underlying subsidiaries

**Relative Seniority/Subordination Of Instrument** The claims of the instrument holders will rank superior to the claims of ordinary shareholders.

**Credit Enhancement** Sukuk has a multi-layered protection mechanism that provides intrinsic mitigation against unforeseen risks. Sukuk is secured by way of i) shares of TPL Properties, shares of TPL Trakker and TPL REIT units ii) Debt Payment Accounts (DPA) and iii) insurance guarantee. The securities pledged against the instrument are TPL Properties Limited (178.8 mln shares), TPL Trakker Limited (15.5 mln shares) and TPL REIT (24.74mln units) with the initial margin maintained by the Company at 50% while the Company is required to maintain at least 30% margin at all times. However, during CY23 the margin have remained volatile which the Company is managing by adding additional securities. The DPA is being held under exclusive lien for the benefit of the Participating Institution(s). DPA is being funded by a) the dividends from group companies, b) proceeds from the sale of Sponsor shares in TPL Trakker, and c) Right share issuance of the Company. The cash entrapment threshold for the proceeds from the sale of shares of TPL Trakker is two upcoming installments. Similarly, the cash entrapment threshold for the proceeds from Right Share issuance is three upcoming installments. The maximum length of the cure period can be 15 days. The cure period availed would attract markup at the rate of 3MK + 250bps instead of the instrument existing markup at the rate of 3MK +225bps. In addition to the above-stated security, the TPL Corp Sukuk and TFC are also secured by way of an insurance guarantee amounting to PKR 75mln each in favor of TFC and Sukuk holders. This guarantee would cover the quarterly interest payment of the PP Sukuk and PPTFC

### Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	<b>Highest credit quality.</b> Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	<b>Very high credit quality.</b> Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	<b>High credit quality.</b> Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	<b>Good credit quality.</b> Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	
BB	<b>Moderate risk.</b> Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB-	
B+	
B	<b>High credit risk.</b> A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	
CC	<b>Very high credit risk.</b> Substantial credit risk "CCC" Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. "CC" Rating indicates that default of some kind appears probable. "C" Ratings signal imminent default.
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

\*The correlation shown is indicative and, in certain cases, may not hold.

**Outlook (Stable, Positive, Negative, Developing)** Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

**Rating Watch** Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

**Suspension** It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

**Withdrawn** A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults, or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

**Harmonization** A change in rating due to revision in applicable methodology or underlying scale.

**Surveillance.** Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.

**Note.** This scale is applicable to the following methodology(s):

- a) Broker Entity Rating
- b) Corporate Rating
- c) Debt Instrument Rating
- d) Financial Institution Rating
- e) Holding Company Rating
- f) Independent Power Producer Rating
- g) Microfinance Institution Rating
- h) Non-Banking Finance Companies Rating
