Rating Rationale and Key Rating Drivers

The ratings reflect the established position of Nishat Mills as a premier export-oriented composite unit, with a sizable strategic portfolio and conservative capital structure. The Company enjoys prominence in the textile sector due to the wide array of its products, extensive outreach, and stable customer base. Meanwhile, the Company's revenues are consistently on a growing trajectory on account of both favorable rate and volume variance. Moreover, a factor of continuous BMR has assisted the Company in maintaining its leading position. Although the Company remained moderately leveraged, its gearing increased from ~27.97% to ~34.68% at end of FY22 mainly due to an increase in short-term borrowing. Considering the hikes in exchange rates and supply side disruption due to recent flood devastation the company is going to issue the short-term Sukuk to manage its supply chain smoothly. The Company's association with Nishat Group as its flagship entity remains a key rating factor. Textile industry dynamics are proving to be vigorous mainly due to an increase in demand for textile products internationally and the channeling of export orders towards the Pakistani market. Export's front witnessed a strong increase and is expected to stay positive in the medium term where the demand for textile products is expected to sustain. Meanwhile, the Company continues to receive sizable dividend income from its diversified investment portfolio which provides comfort to the ratings. The Company is expected to maintain its very strong financial profile.

The ratings are dependent upon the company's ability to sustain its healthy business profile amidst strong competition, herein, effective and prudent management of financial risk indicators remains important. Moreover, upholding of governance framework is vital.

Issuer Profile

Profile Nishat Mills Limited ("Nishat Mills" or "the Company") is a listed concern, which commenced operations in 1951. Nishat Mills is the flagship company of Nishat Group. Nishat Group is one of the renowned business conglomerates in Pakistan. Nishat Mills' current operational capacity comprises 303,048 Spindles, 959 Looms, 4 Rotary Printing Machines, 11 Digital Printing Machine, 5 Thermosole Dyeing and 4,317 Stitching Machines. Overall, Nishat Mills has 32 manufacturing units each specializing in a specific product range. The total energy requirement of the Company is ~50 MW, which is met through in-house generation. Meanwhile, the Company has LESCO & FESCO connections as alternative sources.

Ownership Nishat Mills is the flagship company of Nishat Group. Mian Mansha's family collectively owns the majority (~51%) shares of the Company, directly through individuals (~42%) and group companies (~8%). The remaining (~49%) stake is spread among financial institutions, companies, and the general public. Only one member of Mansha family hold a position in Nishat Mills Limited. Moreover, the next generation is already in business, serving in various capacities in Nishat Group. Roles are functionally divided among three brothers. Nishat Mills is among the pioneers of progressive textile manufacturers of Pakistan, with approximately seven decades of presence in the textile value chain. The sponsors have seen several economic cycles and kept the growth trend intact to become the leading textile concern in the country. Nishat Group is one of the most distinguished business groups in Pakistan. The Group maintains a substantial presence in the country's financial sector and has a strong foothold in the textile, cement, power, dairy, automobile assembly industry and hospitality sectors.

Governance The board comprises seven members with two directors representing the sponsoring family, including the Chairman and the CEO. The remaining directors include two independent members, one executive directors, while all other members are non-executive directors working with other Nishat Group entities. Board members have diversified experience and relatively long association with the Company. The Chairman of the board – Mr. Hassan Mansha – carries with him over two decades of experience in the textile value chain. Appropriate board size and presence of independent oversight bodes well for effective governance. Meanwhile, the Company's board has two board committees, the Audit, and Human Resource & Remuneration Committee, to assist the board on relevant matters. M/s. Riaz Ahmad & Company, Chartered Accountants, listed on panel of SBP, are the external auditor of the Company. The auditors have expressed an unqualified opinion on the financial statements for the period ending June, 2021. The auditors have a satisfactory QCR rating from ICAP.

Management Management control vests with Nishat Group, with a well-defined reporting line to ensure smooth operations and efficiency. Mr. Umer Mansha – the CEO – primarily manages the Company's affairs and is supported by a team of seasoned professionals. Mr. Umer Mansha is associated with the Company since 1994. The Company's management meetings are held on a periodic basis to ensure efficiency and formulate strategic plans. The top management tier ensures effective delegation of functional responsibility across various departments, facilitating smooth flow of operations. The Company's monthly MIS comprises comprehensive segment and unitwise performance reports including daily raw material consumption, production, inventory status and monthly pricing analysis, comparison of actual vs. budgeted performance, export vs. imports, and plant efficiency reports. Nishat Mills deploys Oracle-based Enterprise Resource Planning (ERP) system that provides comprehensive MIS reporting. The Company is accredited with international certifications for compliance. Nishat Mills has valid certificates for its products and facilities and is periodically audited to ensure compliance.

Business Risk During the period FY22, textile exports surged ~25% YoY, fielding \$19.3 billion in total export remittances, as compared to \$15.4 billion in FY21. This is attributable to an increase in demand for textile products internationally and the channeling of export orders toward the Pakistani market. On a YoY basis, the exports of value-added textile items increased in both quantity and value. Going forward, the textile sector's outlook is expected to stay positive in the medium term where the demand for textile products is expected to sustain. In the local market, the textile sector has recorded strong performance. The relief measures introduced by the State Bank of Pakistan such as deferment of loan payments for one year, low-interest rates, and a salary refinance scheme also provided comfort to the sector. Many players have also availed of the TERF scheme announced by the Central Bank. This will lead to the overall leverage of the sector to increase; however, on relaxed financing rates. The sustainability of the demand pattern for the current higher orders from Europe and the USA remains essential for the feasible utilization of added capacity by textile players. Nishat Mills is the largest composite textile unit in Pakistan with considerable representation, throughout the textile value chain. During FY22, the Company's top-line clocked in at PKR 115.8bln (FY21: PKR 71.4bln), posting notable growth of ~62.18%. The growth is driven by both favorable rate and volume variance. The sales mix of Nishat Mills continued to be dominated by exports of ~65% in FY22. While the GP Margin has meagerly increased to FY22: ~15% (FY21: ~13%). While the operating profit margin has increased from FY21: ~6.8% to FY22: ~8.6%. Despite an increase in raw material and energy costs, gross margin increased mainly on the back of better marketing strategies. Another reason for the increase was the depreciation of the Pak Rupee against the US dollar by ~30% during the year. Profit after tax of the company also sizably enhanced to PKR 10.3bln in FY22 (FY21: PKR 5.9bln). The Company is continuously in the process of up-gradation and expansion. Expansion in the spinning and towel segment is expected to have a further positive impact on the volumes of the Company. Recently, the increase in cotton prices has resulted in inventory gains for many players. The company, however, planned to cover annual raw cotton requirements with a mix of local and imported cotton by closely watching market dynamics.

Financial Risk The Company meets its working capital requirements through a mix of internal generation and short-term borrowings (STBs). With the decrease in average inventory days, a slight decrease in net working capital days was recorded in FY22 at ~82days (FY21: ~94days). During FY22, Nishat Mills' cashflows (FCFO) improved to PKR 11.9bln as compared to PKR 6.3bln in the same period last year. Consequently, interest coverage improved (FY22: ~8.2x, FY21: ~7.1x) and remained strong. Debt coverages also improved (FY22: ~2.2x, FY21: ~1.2x). The gearing of the company has increased as at end of FY22 to ~34.68% (end of FY21: ~27.97%). During FY22, out of total Debt, short-term borrowing constitutes ~61.7% increase from ~54.3% in FY21. Further, approximately 83% of total borrowing is borrowed from SBP at concessionary rates.

Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	
BB	Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB-	
B+	
B	High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	
CC	Very high credit risk. Substantial credit risk "CCC" Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. "CC" Rating indicates that default of some kind appears probable. "C" Ratings signal imminent default.
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

*The correlation shown is indicative and, in certain cases, may not hold.

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults, or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.

Note. This scale is applicable to the following methodology(s):

- a) Broker Entity Rating
- b) Corporate Rating
- c) Debt Instrument Rating
- d) Financial Institution Rating
- e) Holding Company Rating
- f) Independent Power Producer Rating
- g) Microfinance Institution Rating
- h) Non-Banking Finance Companies Rating
