### Rating Rationale and Key Rating Drivers

The ratings incorporate the strategic importance of K-Electric Limited, (“the Company” or “KE”) as the only vertically integrated power utility company in Pakistan which means it is responsible for generation, transmission, as well as distribution of electricity in Karachi and other adjoining areas of Sindh and Balochistan. KE’s Investment Plan of PKR 392bln has been approved for FY 2024 to FY 2030, which is aimed for 30% growth in customers, 20% increase in KE’s share of renewables and another 30% reduction in power outages. KE’s Power Acquisition Programme (PAP) for the period FY 2024 to FY 2028 has been approved by NEPRA on May 20, 2024 to develop a long-term capacity expansion plan to meet the energy demand in a reliable, sustainable and cost-effective manner as the Supplier of Last Resort (SoLR) for its licensed service territory. However, KE’s Multi Year Tariff (MYT), which expired in June’23, has been filed and the KE management is actively pursuing NEPRA for timely conclusion of its petitions for award of MYT post June’23. Drawing from previous MYT experiences, KE has filed separate tariff petitions for its business segments (Generation, Transmission, Distribution and Supply). The Generation Tariff is at more advance stage with a decision expected by end of Sep’24. For the Transmission, Distribution and Supply tariff petition, public hearing was held on 27th June 2024 and the subsequent deliberations are expected to be concluded soon. Accordingly, in the absence of approved MYT, the financial statements for all the quarters of FY24 remain unavailable. It may be further noted that the Company has already apprised its apex regulators that is NEPRA, SECP and PSX on the subject matter.

The outcome of the tariff determination exercise and its subsequent impact on KE remains pivotal in determining and maintaining the validity of the assigned ratings. Timely completion of the process is imperative for ratings as well as assessment of KE’s financial stability and operational performance.

## Issuer Profile

**Profile** K-Electric ("KE" or the "Company"), was incorporated in 1913 under the Companies Act, 2017 and its shares are listed on the Pakistan Stock Exchange. KE's current power generation capacity is 2,817MW. In addition to its own generation capacity, KE has power purchase agreements (PPA) with several IPPs & CPPA-G for 1,650MW+. KE's transmission network is interconnected with NTDC and comprises 220KV, 132KV, and 66KV transmission lines, 72 grid stations and 181 power transformers. KE is principally engaged in the generation, transmission and distribution of electric energy under the Electricity Act, 1910 and the Regulation of Generation, Transmission and Distribution of Electric Power Act, 1997 (XL of 1997) (the "NEPRA Act") read with the NEPRA (Electric Power Supplier) Regulations, 2022 and the NEPRA (Electric Power Procurement) Regulations, 2022.

**Ownership** KES Power Limited holds 66.4% shares in K-Electric, while the Government of Pakistan owns 24.4%. KES Power has three major shareholders i.e. Al-Jomaih Group of KSA, NIG of Kuwait and IGCSPV 21 Limited (an SPV registered in Cayman Islands).

**Governance** The overall control of K-Electric Limited ("KE" or "the Company") vests in 13-member Board of Directors (BoD), including the CEO, where majority is nominated by KES Power Limited (KESP), KE's holding company. In addition to KESP's nominees, the Board also comprises of the directors nominated by Government of Pakistan (GoP) and an independent director. However, in October 2022, resignation of 3 directors nominated by KESP resulted in casual vacancies on the Board which cannot be filled by the Company as it is restricted from making change in its current Board composition in view of the following: i) An ad-interim order of the High Court of Sindh was passed on 21 October 2022, in the suit filed by Al Jomaih Power Limited & Denham Investments Limited against IGCSPV 21 Limited and others whereby no change shall be affected in the present Board of the Company. ii) A directive under section 125 of the Securities Act, 2017 was issued by Securities and Exchange Commission of Pakistan on 08 November 2022 according to which the composition of the current BoD of KE shall not be changed, till further orders of the Commission. Further, Mark Gerard Skelton was appointed by the BOD as its Chairman in August 2022. Mark Skelton is a Managing Director with Alvarez & Marsal's (A&M's) Advisory practice in London. He has more than 20 years of experience in corporate finance and advisory. His primary areas of concentration are cross border assignments across different legal jurisdictions and waterfall classes. At present, there are four committees at the board level namely, (i) Audit; (ii) Finance; (iii) Human Resource & Remuneration; and (iv) Board Strategy & Project for ensuring the smooth flow of the Board's functions. Presence of GoP's nominee directors and an independent director on the Board and its committees brings depth and perspectives to the Board's conduct and bodes well for the governance. A. F. Ferguson & Company, Chartered Accountants, are the external auditors of the Company.

**Management** KE's core business operations are divided into three business segments namely Generation, Transmission & Distribution. These are managed through a well-defined hierarchal structure of qualified and experienced professionals. Mr. Moonis Alvi has been spearheading the Company since he took charge as CEO in June 2018 and Mr. Muhammad Aamir Ghaziani has been leading as the CFO of the company. To enable the smooth running of its core functions, KE has constituted four strategic divisions namely (i) Supply Chain, (ii) Corporate Strategy, (iii) Health Safety and Environment, and (iv) Special Projects – which aid in the execution of the Company's overall strategy. Each division head reports directly to the CEO. Moreover, KE has also implemented SAP's Customer Relationship Management Solution that has been designed for utilities alongside creating a data repository using SAP Business Warehousing Solution. The Company is also in the process of making its transition towards SAP S4HANA. Keeping customer centricity at the heart of everything, these tech solutions have been deployed to keep all business processes efficient and transparent. There has been automation in the day to day operations including meter to cash cycle, procure to pay cycle, energy loss management, Time of Use Tariffs, etc. Another key initiative is integration of the state-of-the-art Supervisory Control and Data Acquisition communication system at nine newly constructed grids at the Load Dispatch Center.

**Business Risk** As on June 30, 2023 the total installed capacity of the country stood at 45,885MW including 3,523MW of KE, which is largely distributed towards the thermal side followed by the hydel. Currently, the renewable energy holds approximately 5% of the total installed capacity which is expected to increase going forward. Total electricity generated in the country during FY23 amounted to 138,029 GWh (FY22: 154,056 GWh). Out of which KE distributed ~7% of the electricity. KE is the only vertically integrated power utility company responsible for the generation, transmission, and distribution of electricity in Karachi and adjacent areas of Sindh and Balochistan. KE has a registered customer base of ~3.7mln at end-Mar'24, of which 84.34% constitute residential consumers, 14.96% commercial, Industrial 0.64%, and the remaining comprises of agricultural and public consumers. KE reduced its Transmission and Distribution (T&D) loss to 15.3% in FY23 and is actively working to reduce these losses, moving forward. Drawing from previous MYT experiences, KE has filed separate tariff petitions for its business segments (Generation, Transmission, Distribution and Supply). The Generation Tariff is at more advance stage with a decision expected by end of Sep'24. For the Transmission, Distribution and Supply tariff petition, public hearing was held on 27th June 2024 and the subsequent deliberations are expected to be concluded soon.

**Financial Risk** KE manage its working capital through mix of short-term borrowings and internally generated cash. KE has finalized PPA with the Authority, the formally signed agreement enable KE to adjust payments to CPPA-G with Tariff Differential Claims receivable from the Government, thereby ensuring a balanced net position. As per management, the actual position of cashflows and the debt profile of the Company is in comfortable position and it's expected that the same trend continue going forward. The approval of the Investment Plan of PKR 392 billion is expected to contribute to a surge in debt, primarily directed towards enhancing the transmission and distribution segments. However, support drawn from fact that KE has marked its funds in Master Collection Accounts (MCA) for repaying its long-term debt, ensuring timely obligations.

## Instrument Rating Considerations

**About The Instrument** KE issued a rated, unsecured, privately placed, short-term, sukuk ("PPSTS-28") amounting PKR 7,000mln on 05-Aug-24, to finance the Company's working capital requirements. PPSTS-28 issued in replacement of privately placed short-term sukuk ("PPSTS-23") of PKR 5,000mln which was redeemed on 15-Aug-24. The tenor of PPSTS-28 will be 6 months and is carrying a profit rate of 6MK+20bps. Profit and principal will be realized at the time of maturity.

**Relative Seniority/Subordination Of Instrument** The sukuk is unsecured and in the hierarchy of creditors, the investors shall rank after the secured lenders/investors of the Company.

**Credit Enhancement** The instrument is unsecured.

### Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

Scale	Long-term Rating Definition
AAA	<b>Highest credit quality.</b> Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments
AA+	
AA	<b>Very high credit quality.</b> Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
AA-	
A+	
A	<b>High credit quality.</b> Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions.
A-	
BBB+	
BBB	<b>Good credit quality.</b> Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BBB-	
BB+	
BB	<b>Moderate risk.</b> Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met.
BB-	
B+	
B	<b>High credit risk.</b> A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
B-	
CCC	
CC	<b>Very high credit risk.</b> Substantial credit risk "CCC" Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. "CC" Rating indicates that default of some kind appears probable. "C" Ratings signal imminent default.
C	
D	Obligations are currently in default.

Scale	Short-term Rating Definition
A1+	The highest capacity for timely repayment.
A1	A strong capacity for timely repayment.
A2	A satisfactory capacity for timely repayment. This may be susceptible to adverse changes in business, economic, or financial conditions.
A3	An adequate capacity for timely repayment. Such capacity is susceptible to adverse changes in business, economic, or financial conditions.
A4	The capacity for timely repayment is more susceptible to adverse changes in business, economic, or financial conditions. Liquidity may not be sufficient.

\*The correlation shown is indicative and, in certain cases, may not hold.

**Outlook (Stable, Positive, Negative, Developing)** Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. 'Stable' outlook means a rating is not likely to change. 'Positive' means it may be raised. 'Negative' means it may be lowered. Where the trends have conflicting elements, the outlook may be described as 'Developing'.

**Rating Watch** Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

**Suspension** It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

**Withdrawn** A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults, or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

**Harmonization** A change in rating due to revision in applicable methodology or underlying scale.

**Surveillance.** Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.

**Note.** This scale is applicable to the following methodology(s):  
 a) Broker Entity Rating  
 b) Corporate Rating  
 c) Debt Instrument Rating  
 d) Financial Institution Rating  
 e) Holding Company Rating  
 f) Independent Power Producer Rating  
 g) Microfinance Institution Rating  
 h) Non-Banking Finance Companies Rating
