Rating Rationale and Key Rating Drivers

The ratings took comfort from strong business profile of Foundation Power Company Daharki Limited (Foundation Power) emanating from the demand risk coverage under Power Purchase Agreement and company's association with Fauji Foundation (FF). Meanwhile, the Implementation Agreement provides sovereign guarantee for cashflows, given adherence to agreed performance benchmarks. The ratings incorporate low operational risk, a result of the performance of KEPCO - the O&M operator. Fuel of the plant is 'low BTU' gas, which is supplied by an associate - Mari Petroleum Company Limited (40% owned by Fauji Foundation). Supplier being a sister concern reduces fuel supply risk. Significant increase in account receivables create a challenge to working capital management. However the risk is substantially mitigated through aligning payments to fuel supplier with energy billing related receipts. Short-term borrowing lines of PKR 410 million at end-Sep20, out of which ~61% has been utilized. Rating reflects the low financial risk of the company as all the project related long term loan has been repaid.

Sustained good financial discipline and upholding strong operational performance in line with agreed performance levels remain important. Accumulation of circular debt would pose threat to the company's ability to continue with this practice. However, the management is ably supported by sponsor who remains committed towards commercial obligations. Further the Company is on priority list of NTDC's payment merit order because of low unit cost of electricity.

The Pakistan Credit Rating Agency Limited

Profile

Plant Foundation Power Company Daharki Limited (Foundation Power), a public limited company, is operating a combined cycle power plant on a build-own-operate (BOO) basis with a net initial capacity of 180MW (7.8MW auxiliary consumption).

Tariff Foundation Power key source of earnings is the generation tariff from the power purchaser, NTDC. The reference generation tariff comprises a capacity charge component and an energy charge component. Foundation Power's levelized tariff is US¢ 6.55/kWh.

Return On Project The dollar IRR of Foundation Power, as agreed with NEPRA is 15%.

Ownership

Ownership Structure Foundation power is majority owned by Daharki Power Holdings Limited (DPHL), which, in turn is owned by Fauji Foundation (FF) (81%) and Asian Development Bank (ADB) (19%).

Stability Stability in the IPPs is drawn from the agreements signed between the company and power purchaser. However, Company's association with Fauji Foundation group and Asian Development Bank will continue to provide comfort.

Business Acumen Sponsor groups have significant experience in the generation and selling of energy, fertilizer, cement and chemicals.

Financial Strength Fauji Foundation (also known as Fauji Group), is amongst the largest business conglomerate in Pakistan. The financial strength of the sponsor is considered strong as the sponsor has well diversified profitable businesses.

Governance

Board Structure The six-member Board, comprising five representatives from Fauji Foundation and one from Asian Development Bank provides adequate guidance to the company.

Members' Profile Fauji Foundation's strong professional profile assists the management in terms of strategic guidance and implementation of strong control framework.

Board Effectiveness The experiences of board will help guiding the management in developing effective operational and financial policies. The board had previously formulated three committees, i) Audit and Finance Committee, ii), Technical Committee and (iii) Human Resource Committee to ensure smooth and effective monitoring of operations. However during the year, these committees have been merged into a single Audit & HR Committee. Participation of all board members during board meetings remained satisfactory.

Financial Transparency A.F. Ferguson & Co. has been engaged as Foundation Power's external auditors. The auditors expressed an unqualified opinion on the audited financial statements of the company for the year ended June 30, 2020.

Management

Organizational Structure Foundation Power has a lean management structure, mainly comprises finance, administration and technical staff. The management control of the company vests with Daharki Power Holdings Limited (DPHL), which, in turn is owned by Fauji Foundation (FF), being largest shareholder.

Management Team Maj Gen Asghar Nawaz, HI(M) (Retd) is the Managing Director of Foundation Power Company. He had a distinguished career in the Pakistan Army. The management team is experienced and is ably handling the affairs of the company.

Effectiveness The management of Foundation Power is mostly engaged in the finance related activities. The operations and maintenance of the plant have been outsourced to KEPCO Plant Service & Engineering Company Limited (KEPCO). The management has engaged three site engineers, with the title of managers, who maintain daily correspondence with the O&M team to ensure oversight and liaison with the head office.

Control Environment The company maintains an adequate MIS which helps management to keep track of all operations and liaison with O&M operator.

Operational Risk

Power Purchase Agreement Foundation Power's key source of earnings is the revenue generated through sale of electricity to the power purchaser, NTDC/ CPPA-G. The Company will receive the capacity payments if it is at the benchmark availability and is ready to provide electricity, even if no purchase order is placed by Power Purchaser, further there is also a consequence of take or pay, in case of energy billing. The term of the agreement is 25 years.

Operation And Maintenance Foundation Power Company has negotiated an O&M contract with KEPCO for a period of 18 years, signed in 2008. KEPCO, the O&M operator, ensures adherence of the plant to meet minimum performance benchmarks (Availability: Actual: 93.29%; Benchmark: 88%, Efficiency: Actual: 48.8%; Benchmark: 48.8%) during FY20.

Resource Risk Foundation Power Company has negotiated the GSA with Mari Petroleum, for supply of 65mmcfcd of Low BTU Gas to the plant. The contract is for a period of 25 years. The construction and commissioning of the gas pipeline was completed in February 2009.

Insurance Cover Insurance Cover Foundation Power has adequate insurance coverage for property damage and business interruption.

Performance Risk

Industry Dynamics Pakistan's total power generation is increasing on the back of new power projects under CPEC. Owing to newly installed plants, Pakistan's energy mix is shifting towards Solar/Gas/RLNG and coal from Furnace Oil and other expensive sources. Till April, FY2020, installed capacity of electricity has reached to 35,972 which was 33,452 MW in April 2019, posting a growth of 7.5%.

Generation The plant generated a total of 338 GWh of electricity from Jan20 to June20, against 431 GWh in last six months depicting a low demand from power purchaser.

Performance Benchmark The required availability for Foundation Power under the PPA is 88%. During FY20, Foundation Power Daharki's efficiency and availability has been maintained according to agreed parameters. Meanwhile, the efficiency of the plant was 48.8% during FY20 (FY19: 48.8%); at par with the required benchmark of 48.8%.

Financial Risk

Financing Structure Analysis Foundation Power's project cost (75%) was financed through a syndicated term finance loan. The loan size, PKR 11,565mln, was priced at 6- month KIBOR + 2.93% p.a. which was fully paid in Mar20.

Liquidity Profile At Sep 20, trade receivables of the company stood at PKR 13,683mln (FY20: PKR 13,464mln). As circular debt continues to be an issue for companies operating in power sector. Consequently, IPPs have to manage their liquidity requirements from internal cash generation and short-term borrowings.

Working Capital Financing Increased trade payable days at 3MFY21: 289 days (end-FY20: 276 days), , Somehow covered the significant increase in receivable days. Company has short term credit lines of PKR 410 mln out of which ~61% is utilized at period end Sep-20

Cash Flow Analysis FPCDL's improved profits have resulted from high demand of low cost electricity and in turn have also resulted in improved free cashflows from operations (FCFO) at 3MFY21: 1,199mln (FY20: 4,495mln). During the period, owing to reduced finance cost, the company's coverages reflects significant improvement.

Capitalization Foundation Power has a low leveraged capital structure (Total Debt/Total Debt+Equity) as at Sep20 stood at 1.7% (FY20: 1.8%).

Credit Rating

Credit rating reflects forward-looking opinion on credit worthiness of underlying entity or instrument; more specifically it covers relative ability to honor financial obligations. The primary factor being captured on the rating scale is relative likelihood of default.

| Scale | Long-term Rating Definition |
|-------|---|
| AAA | Highest credit quality. Lowest expectation of credit risk. Indicate exceptionally strong capacity for timely payment of financial commitments |
| AA+ | |
| AA | Very high credit quality. Very low expectation of credit risk. Indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events. |
| AA- | |
| A+ | |
| A | High credit quality. Low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be vulnerable to changes in circumstances or in economic conditions. |
| A- | |
| BBB+ | |
| BBB | Good credit quality. Currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. |
| BBB- | |
| BB+ | Moderate risk. Possibility of credit risk developing. There is a possibility of credit risk developing, particularly as a result of adverse economic or business changes over time; however, business or financial alternatives may be available to allow financial commitments to be met. |
| BB | |
| BB- | |
| B+ | |
| B | High credit risk. A limited margin of safety remains against credit risk. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment. |
| B- | |
| CCC | |
| CC | Very high credit risk. Substantial credit risk “CCC” Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. “CC” Rating indicates that default of some kind appears probable. “C” Ratings signal imminent default. |

Outlook (Stable, Positive, Negative, Developing) Indicates the potential and direction of a rating over the intermediate term in response to trends in economic and/or fundamental business/financial conditions. It is not necessarily a precursor to a rating change. ‘Stable’ outlook means a rating is not likely to change. ‘Positive’ means it may be raised. ‘Negative’ means it may be lowered. Where the trends have conflicting elements, the outlook may be described as ‘Developing’.

Rating Watch Alerts to the possibility of a rating change subsequent to, or, in anticipation of some material identifiable event with indeterminable rating implications. But it does not mean that a rating change is inevitable. A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled. Rating watch may accompany rating outlook of the respective opinion.

Suspension It is not possible to update an opinion due to lack of requisite information. Opinion should be resumed in foreseeable future. However, if this does not happen within six (6) months, the rating should be considered withdrawn.

Withdrawn A rating is withdrawn on a) termination of rating mandate, b) the debt instrument is redeemed, c) the rating remains suspended for six months, d) the entity/issuer defaults., or/and e) PACRA finds it impractical to surveil the opinion due to lack of requisite information.

Harmonization A change in rating due to revision in applicable methodology or underlying scale.

Surveillance. Surveillance on a publicly disseminated rating opinion is carried out on an ongoing basis till it is formally suspended or withdrawn. A comprehensive surveillance of rating opinion is carried out at least once every six months. However, a rating opinion may be reviewed in the intervening period if it is necessitated by any material happening.
